

SEE YOUR MOVEMENTS LIKE NEVER BEFORE

### ALL YOUR DATA ARE BELONG TO US

This is where a basic description about what data we get and where it would go and how it's private and how awesome it will be. This is where a basic description about what data we get and where it would go and how it's private and how awesome it will be.

I'm ready

### THINGS YOU MIGHT BE WONDERING

Where is my data going to go?

Here's where we'll convince them why this is totally not something to worry about. Here's where we'll convince them why this is totally not something to worry about.

Does it matter what kind of phone I have?

Here's where we break the terribly said news about iPhone users having to suck it because Google might not have very much (if any) data on them.

Is this anonymous or super creepy?

Here's where we'll convince them why this is totally not something to worry about. Here's where we'll convince them why this is totally not something to worry about.

#### STEP ONE

First, you'll need to make sure you're logged in the Gmail account associated with your phone. Go ahead and do that, then click the button below.

I'm logged in

#### STEP TWO

Now it's time to download your GPS data from googles servers. This data is anonymous and in no way associated with your identity. Learn more here. Click the button below when you're ready, and you'll be prompted to save the file on your computer.

Download my data

#### STEP THREE

You're almost there! The last thing we need is for you to upload the anonymous GPS data you downloaded into our system.

Pick a file

#### READY TO GO!

You're data has been uploaded into our system. It's time to see it in action!

Visualize my data
