## Filter your data as you see fit

Our tool provides a variety of filters to explore your data and see it in new ways - be it filtering by time or using a variety of visual styles.

## Compare with other data sources

Using our library of filtering methods, you can compare your location based data with other sources as well - weather and beyond.

## Open hearts, open source

All of our code is available for your viewing pleasure, use, and suggestions. You can check it out on Github [here](#).
